# ZUNAIR SHAHID

Full-Stack Engineer | +92 331 477 4138 | zunairshahid02@gmail.com| Portfolio | GitHub | LinkedIn

## PROFESSIONAL SUMMARY

Full-Stack Engineer with nearly 16 months of hands-on experience spanning healthcare SaaS, freelance development, and open-source projects. Proficient in React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, and PostgreSQL, with expertise in building secure REST APIs, JWT authentication, role-based access control (RBAC), and responsive user interfaces. Published an open-source React component library with 700+ npm downloads and developed AI-powered solutions using RAG pipelines, LangChain, LangGraph, and multi-agent LLM architectures. Collaborative engineer committed to clean code, maintainable architecture, performance optimization, and scalable software solutions.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
**Frontend:** React.js, Next.js, Redux Toolkit, Hooks, Context API, Tailwind CSS
**Backend:** Node.js, Express.js, FastAPI, RESTful APIs, JWT Authentication, RBAC, Socket.IO, Redis, API Integration
**Databases:** PostgreSQL, MongoDB, Database Schema Design
**AI & ML:** LangChain, LangGraph, RAG, Vector Databases (Pinecone), LLM Integration, Prompt Engineering
**Tools & Practices:** Git, GitHub, Postman, Vercel, Agile, Code Review

## PROFESSIONAL EXPERIENCE

**Frontend Engineer (Part-Time - Remote)** *Jun 2026 – Oct 2026*
*ClaraVision – Healthcare SaaS Platform*

- Built 5+ responsive modules using React.js, TypeScript, React Hooks, Context API, and Redux Toolkit in an Agile team of 4 engineers.
- Integrated RESTful APIs with PostgreSQL-backed services, implementing JWT authentication and Role-Based Access Control (RBAC) to secure user data.
- Built responsive, cross-browser compatible UIs using Tailwind CSS, HTML5 and reusable components for maintainability.
- Maintained code quality through Git/GitHub workflows, peer code reviews, unit testing, debugging, and CI/CD pipelines.

**Freelance Full-Stack Engineer (Freelance - Remote)** *Nov 2025 – Dec 2025*
*Fiverr – Engineering Automation Solutions*

- Built a responsive, SEO-optimized Next.js landing page with SSR and Tailwind CSS, reducing load time to under 2 seconds and improving Core Web Vitals and client conversions.
- Built a real-time reporting tool (Socket.IO) with automated CSV/PDF exports and third-party API integrations.
- Designed KiCad-based design automation software to streamline engineering workflows and automate data export.

**Research Intern Blockchain Security** *Jan 2026 – Feb 2026*
*Bahria University – Blockchain Security*

- Researched post-quantum cryptography to strengthen blockchain security against quantum computing threats.
- Evaluated quantum-resilient blockchain architectures and consensus mechanisms for security, scalability and interoperability.

## PROJECTS PORTFOLIO

**Ruler.ui – Open-Source React Component Library** *Aug 2026 – Sep 2026*
*React, TypeScript, Next.js, Tailwind CSS v4, CVA, tsup, Vercel* | Ruler.ui.com

- Published an MIT-licensed npm library with 25+ reusable, type-safe React/TypeScript components and full documentation.
- Achieved 700+ npm downloads built dark/light themes with optimized ESM/CJS builds using tsup.
- Manage software releases using Git/GitHub, version control and issue tracking while following industry best practices.

**OrchestrAI – Multi-Agent AI Platform** *Jul 2026 – Aug 2026*
*React, Redux, Express.js, LangChain, LangGraph, RAG, MongoDB, Redis* | Orchestrationai.netlify.com

- Built a multi-agent platform with LangGraph, Google Gemini and Grok SDK using stateful orchestration and intelligent routing.
- Developed a RAG document pipeline with Gemini Embeddings and used Redis for rate limiting and caching.

**SmartAsk – RAG-Based AI Chatbot** *May 2026 – Jun 2026*
*Node.js, Express.js, FastAPI, LangChain, LangGraph, Pinecone, Vector Database* | SmartAsk.github

- Built a RAG pipeline with semantic retrieval and vector database integration, achieving query responses under 450ms.
- Optimized document processing and retrieval workflows to improve response accuracy and system performance.

## EDUCATION

**Bachelor of Science in Information Technology** *Mar 2023 – Dec 2026 (Expected)*
Bahria University, Lahore | CGPA: *3.37 / 4.0*

## CERTIFICATIONS

- **AWS Fundamentals of Prompt Engineering –** ***Amazon Web Services (Aug 2026)***
- **Artificial Intelligence –** ***IBM (Apr 2026)***
- **Data Transformation –** ***MongoDB (Sep 2026)***
- **Linux Fundamentals (LFS101) –** ***Linux Foundation (Oct 2026)***
