Address: Able to Relocate

PROFILE

A skilled MERN stack developer with around 1 year of experience in developing and maintaining web applications. Skilled in modern web technologies and capable of working effectively in team environments. Focused on writing clean, efficient code and continuously improving technical skills. Eager to contribute to development projects and grow professionally in a dynamic environment.

EDUCATION

Bahria University, Lahore Campus

2022 to Present

Bachelors of Information Technology (CGPA: 3.27)

I am currently pursuing a Bachelors in Information Technology at Bahria University, demonstrating Academic Excellence and Strong Analytical Skills. My coursework includes crucial subjects like Object-Oriented Programming, Data Structures, Database Systems, Web Technologies, and Software Requirement Engineering.

EXPERIENCE

08 November, 25

Worked as a **Freelance Developer** providing full-service front-end solutions. Successfully developed high-performance, clean UI applications, including a custom-branded landing page and a complex real-time reporting system with multi-format export functionality. My responsibilities also extended to specialized projects, such as implementing custom **KiCad** design features and streamlining data export to **CSV** and **PDF**, showcasing flexibility and a focus on documentation.

I am currently building **SabziMart** to simplify grocery delivery for customers riders and admins through a secure and unified platform. Leveraging MongoDB and Redux it provides a scalable and **production-ready architecture** with a reliable end-to-end workflow. This ensures a responsive and high-performance experience that streamlines the entire process from order to delivery.

PROJECTS

Sabzi Mart (Grocery Delivery Platform)

This grocery delivery platform provides a smooth experience for customers, riders, and administrators throughout the entire service journey. It supports user interaction, vendor management, and delivery tracking while focusing on scalability, performance, and real-time functionality.

- **Frontend Engineering:** Built a responsive Next.js and React interface with SSR for better performance and Redux for state management.
- **Backend & Infrastructure:** Developed a secure scalable backend using Socket.IO, NextAuth, and RBAC with real-time tracking, Cloudinary, and MongoDB.

AI Chatbot (RAG-Based)

Engineered an AI chatbot using Retrieval-Augmented Generation (**RAG**) to deliver accurate and context-aware responses. Integrated LangChain, LangGraph, and a vector database to improve information retrieval and enhance overall user experience.

Chat Go (Messaging Platform)

Delivered a secure real-time messaging solution using the MERN stack enabling smooth user communication. Implemented Socket.IO for instant messaging and JWT-based authentication for secure access, while ensuring data integrity and scalability with MongoDB.

DSA Contact Manager (C++)

This project is a contact management system designed to store and organize user contacts efficiently. It demonstrates the practical implementation of data structures and algorithms (DSA) in real-world scenarios. The application enables fast searching, sorting, and management of contact data.

TEACHNICAL SKILLS

Frontend: **React.js, Next.js, TypeScript, Redux, Tailwind CSS, Ant Design, Motion.div animations**

Backend: **Node.js, Express.js, Python, MongoDB, MySQL**

Prototyping: **Figma, Adobe XD**

API Testing: **Postman, Apache JMeter**

ADDITIONAL SKILLS

- Contributed to organizing a large-scale community Iftar event, helping manage tasks and ensuring smooth coordination with the team.
- Demonstrated confidence and audience engagement as a college level singing competition vocalist.
- Showcased teamwork and composure under pressure as a school cricket team member in a tournament final.
- Participated in awareness initiatives with **Alzheimer's Pakistan** focused on dementia, supporting community engagement and promoting understanding of cognitive health issues.
