ZUNAIR SHAHID

Full-Stack Engineer | +92 331 477 4138 | zunairshahid02@gmail.com| Portfolio | GitHub | LinkedIn

SUMMARY

Full-Stack Engineer with hands-on experience building production-ready web applications using MongoDB, Express.js, React.js, Node.js and Next.js. Skilled in scalable REST APIs, secure JWT authentication, role-based access control (RBAC) and responsive user interfaces, with experience across freelance client projects and self-directed development. Additional expertise in AI-powered solutions including RAG pipelines, LangChain, LangGraph and multi-agent LLM systems, with a focus on clean, maintainable and scalable code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT, RBAC, Redis
Databases: MongoDB, MySQL, PostgreSQL
AI & ML: LangChain, LangGraph, RAG, Vector Databases, LLM Integration, NLP
Tools: Git, GitHub, Vercel, Postman, CI/CD

PROFESSIONAL WORK EXPERIENCE

Full-Stack Engineering (Freelance) *Nov 2025 – Dec 2025*
Fiverr Remote

- Built a responsive, SEO-optimized Next.js landing page with SSR and Tailwind CSS, reducing load time to under 2 seconds and improving Core Web Vitals and client conversions.
- Developed a real-time client reporting tool with automated CSV and PDF exports and third-party API integrations, eliminating manual reporting processes.
- Designed custom KiCad-based design automation software to streamline engineering workflows and automate engineering data export.

Full-Stack Engineer (MERN Stack) *Jan 2025 – Present*
Self-Directed

- Developed and maintained full-stack web applications using React.js, Node.js, Express.js and MongoDB, following Agile practices across personal and practice projects.
- Built RESTful APIs with JWT authentication, secure session management and role-based access control (RBAC) to ensure a scalable and secure backend architecture.
- Built reusable React components (Hooks, Context API) and optimized SQL queries and schemas for better performance.

Research Intern, Blockchain & Quantum Computing *Jan 2026 – Feb 2026*
Bahria University

- Researched post-quantum cryptographic techniques and algorithms to strengthen blockchain security against emerging quantum computing threats.
- Evaluated quantum-resilient blockchain architectures and consensus mechanisms to improve security, scalability and interoperability.

PROJECTS PORTFOLIO

Ruler.ui – React Component Library – Ruler.ui.com *Aug 2026 – Sep 2026*
React | TypeScript | Next.js | Tailwind CSS v4 | CVA | tsup | Vercel

- Published an open-source npm library (MIT) with 25+ reusable, type-safe React/TypeScript UI components and documentation.
- Achieved 700+ npm downloads, demonstrating strong developer adoption and open-source impact.
- Built dark/light themes with optimized TypeScript ESM/CJS builds using tsup for efficient package distribution.

OrchestrAI – Multi-Agent AI Platform – Orchestrationai.netlify.com *Jul 2026 – Aug 2026*
React | Redux | Express.js | LangChain | LangGraph | RAG | MongoDB | Redis

- Built a multi-agent platform with LangGraph, Google Gemini and Grok SDK using stateful orchestration and intelligent routing.
- Developed a RAG document pipeline with Gemini Embeddings used Redis for rate limiting and caching.

SmartAsk Chatbot – RAG-Based Assistant – SmartAsk.github *May 2026 – June 2026*
Node.js | Express.js | FastAPI | LangChain | LangGraph | Pinecone | Vector Database

- Built a RAG pipeline with semantic retrieval and vector database integration, achieving query responses under 450ms.
- Optimized document processing and retrieval workflows to improve response accuracy and system performance.

EDUCATION

Bachelor of Science in Information Technology *Mar 2023 – Nov 2026 (Expected)*
Bahria University, Lahore | CGPA: 3.37 / 4.0

CERTIFICATIONS

AWS Fundamentals of Prompt Engineering – **Amazon Web Services** – *Aug 2026*
Artificial Intelligence – **IBM** – *Apr 2026*
Data Transformation Fundamentals – **MongoDB** – *Sep 2026*
Front-End Software Engineering Virtual Experience (React, JavaScript) – **Skyscanner (Forage)** – *Sep 2026*
